

StreamSpace L-cab with engine tunnel 170 mm.

Exterior width [mm]	2300
Exterior length [mm]	2300
Headroom on engine tunnel [mm]	1785
Headroom in front of seats [mm]	1840

The 2300 mm wide StreamSpace cab is designed for one driver operating in national long-distance haulage. It boasts over 100 litres more cab space and 70 litres more storage space compared with its predecessor. It delivers an optimum balance of aerodynamics and living comfort for long-distance operation. Thanks to low wind resistance, the StreamSpace cab helps to keep fuel consumption at a particularly low level. A wide range of additional equipment is optionally available for the StreamSpace cab – to add individuality and comfort to the working/living areas.
